DETAILED ACTION

Objections – 37 CFR 1.75(c)

Claims 3,5 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. In a claim to a composition, a statement regarding the intended use of the composition has no patentable significance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5,14 are rejected under 35 U.S.C. 102(b) as being anticipated by Yang et al (CN 1061908; 6/17/92). Yang teaches an anticancer drug comprising arsenic trioxide plus realgar (arsenic sulfide) plus a carrier (resin or alunite).

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 1616

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-8,11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Ellison et al (US 2002/0183385; 12/5/02). Ellison teaches a composition comprising one or more arsenic compounds (arsenous sulfide, arsenic sulfide, arsenic pentasulfide, tetrasulfide, arsenic trioxide) in a carrier (saline solution, water) to be used in cancer treatment of mammals. See abstract, paragraphs 28,29,43,44,50,61,71,80. Ellison teaches that the composition is administered orally at a daily dosage of about 10Ug to 200 mg. See paragraph 63, claims 1-3,11,12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 56,57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellison as applied to claims 108,11-13 above. See Ellison's 35 USC 102(b) rejection. Ellison teaches all that is recited in claims 56,57 except for the composition comprising the instant amount of arsenic sulfide. It would have been obvious to one having ordinary skill in the art to determine the optimum amount of arsenic sulfide. One would have been motivated to do this in order to develop a composition that would have been most effective in treating cancer.

Claim Objection

Claims 9,10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the invention comprising plant semen or semen platycladi.

Other Matters

Examiner suggests:

In claim 10 line 2 delete "seman" and insert --- semen ---.
